

Single Module mounting

We have an extensive range of single module mounting solutions to suit most applications including flat roof, wall and pole mounting. The range shown below are a basic range to suit BP Solar and Shell modules, most of these products can be manufactured to suit any make/model of solar panel from the small 5 watt panels to the large area panels. Should you have a specific requirement, please contact us to discuss, we may already have a solution for your requirement.

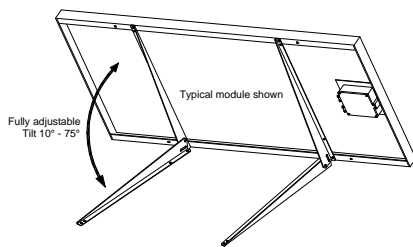

SPFK3

SPFK3 – To suit most solar panels with M6 rear of panel mounting holes.

SPFK4 - To suit most solar panels with M8 rear of panel mounting holes.

TSX-15 - To suit BPSX5M & BPSX10U panels for flat roof, wall or pole mounting with a fixed tilt of 20° or 70°

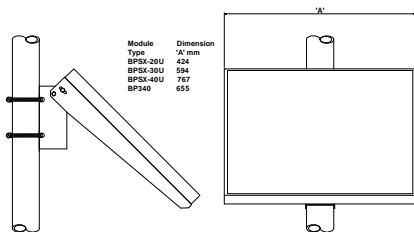

HVA-01

HVA-01 – To suit 50 to 100 watt panels for wall or flat roof mounting with a fully adjustable tilt angle of 10° to 70°

HVB-01 – As above but for up to 50 watt panels

PMA-01 – To suit up to 50 watt panels for pole and wall mounting complete with fully adjustable tilt.

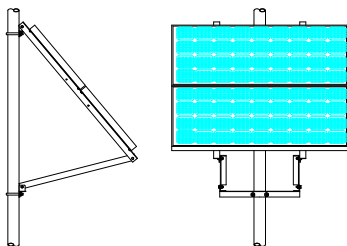

PMA-01

GMA-01 – To suit 50 to 100 watt panels with a fixed tilt angle as required. For wall, flat roof or ground mounting (Aluminium)

GMG-01 – As above except, manufactured in galvanised steel.

GMG-01 – To suit 50 to 100 watt panels, to provide pole mounting with a fully adjustable tilt.

PMG-02 (PMG-01 as above with one panel)

All types of structures can be manufactured, we are happy to talk through any special requirements so as to provide a quality solution to compliment your system.
